Academic Year - 2020-2021

Due to the impact of the COVID pandemic, the colleges had not opened for this academic year and the routine college was working on online mode. Since physical gatherings were not allowed, it was decided to conduct the Orientation Day for the incoming batch of First Year Students of all the streams of SFC in the online mode jointly on 5th September 2020.

Since online programs were a new experience – both for the teaching faculty and the students, this program was quite novel and innovative in the sense that all the information that needed to be provided to the first year students needed to be presented in the virtual mode and hence a detailed power-point presentation was prepared and shown to the attending students containing all relevant information regarding academic curriculum, extra-curricular activities, rules and regulations regarding attendance, examinations and other aspects that the students would require, to equip them for the coming three years of their college life.

The faculty members also introduced themselves virtually to the students and an attempt was made to work around the restrictions in the best possible manner and keep the flow of things going in this virtual mode.

I think it just takes a long time to build up a trust. "

PREFACE

Globalization of the world economy and higher education are driving profound changes in Commerce and Management education system. Internal Quality Assurance Cell has constantly taken various quality initiatives for strengthening the technical subjects in the institute. These initiatives are essential for promoting quality education in our institutions so that our students passing out from these institutions may match the pace with global standards. A quality initiative by IQAC is introducing Curriculum for all first-year undergraduates for technical subject like Accountancy & Financial Management . This curriculum will bridge the gap and form base for the students thus leveraging on outcome-based Model. A One-week mandatory induction/ Bridge course is developed as a part of the model curriculum for the first year BCom students which helps students joining the first year of the college from diverse backgrounds specially for those who come from different streams other than Commerce and find it difficult in Posting and preparing Accounts at Junior level so that they get adjusted in the new environment of the institution. Education is primarily conceived by students as one simple remembering fact by rote. We all know that the students seeking admission in an undergraduate degree B.Com. program have passed their 10+2 in Commerce but it was felt that a student joining a B.Com. program after 10+2 require reinforcement of fundamental accounting concepts i.e. basic Concepts of Book Keeping. This bridge course aim to accelerate the students knowledge of Accountancy acquired at 10+2 level; and bridge the gap for the students who did not study this subject at 10+2 level. Thus, there is a need to understand the basic concepts for understanding actual syllabus. Therefore, it was decided to make One-week Bridge Course programme mandatory for those students coming from other streams and for those students finding the subject difficult. The Syllabus has been developed by the members of Department of Accountancy of Lala Lajpatrai College of Commerce and Economics, Mumbai.

Acknowledgements

Curriculum plays a crucial role in enabling quality learning for our young learners in our society i.e. students. An effective curriculum not only enables a student's learning process & knowledge acquired but also supports students to overcome their inhibitions and aids in their holistic development. IQAC in 2017 released a Model Curriculum for various Undergraduate degree courses Commerce and Management. This curriculum is equipped with making students comfortable for the subject of Accountancy & Financial Management. Bridge Course program has been included as a mandatory program for the first-year undergraduate students to get acquainted and get accustomed to this new environment in the college. A curriculum needs to be consistent and sustainable and it has been noticed that students joining Commerce program required to strengthen their concepts in scientific subject namely Accountancy & Financial Management being from the Non-Accountancy background. Therefore, Department of Accountancy under the aegis of IQAC decided to develop lecture-based bridge course in Accountancy & Financial Management. I take this pleasure to thank Principal Dr. Neelam Arora for her constant support in this endeavour. I also want to thank our IQAC for their valuable guidance and working towards value creation for students. Last but not the least faculty members of Department of Accountancy for their valuable contribution for the same.

These initiatives are essential for promoting quality education in our institutions so that our students passing out from these institutions may match the pace with global standards. A quality initiative by IQAC is introducing Curriculum for all first-year undergraduates for technical subject like Mathematical and Statistical Techniques. This curriculum will Bridge the gap and form base for the students thus leveraging on outcome-based Model. A One-week mandatory induction/ Bridge course is developed as a part of the model curriculum for the first year BCom students which helps students joining the first year of the college from diverse backgrounds specially for those who dint took Mathematics at Junior level so that they get adjusted in the new environment of the institution. Education is primarily conceived by students as one simple remembering fact by rote. We all know that the students seeking admission in an undergraduate degree BCom program have passed their 10+2 in Commerce but it was felt that a student joining an BCom program after 10+2 require reinforcement of fundamental Mathematics and Statistical concepts i.e. basic courses Mathematics and Statistics. This bridge course aim to accelerate the students, knowledge Mathematics and Statistics acquired at 10+2 level; and bridge the gap between the students who dint took these subjects at 10+2 level. Thus, there is a need to understand the concepts for heading to actual syllabus. Therefore, it was decided that students finding it difficult and those from non-Mathematics background should complete the 1-week mandatory Bridge Course programme introduced for the first year UG students. The Syllabus has been developed by the members of Department of Mathematics and Statistics of Lala Lajpatrai College of Commerce and Economics, Mumbai.

Curriculum plays a crucial role in enabling quality learning for our young learners in our society i.e. students. An effective curriculum not only enables a student's learning process & knowledge acquired but also supports students to overcome their inhibitions and aids in their holistic development. IQAC in 2017 released a Model Curriculum for various Undergraduate degree courses Commerce and Management. This curriculum is equipped with making students comfortable for the subject of Mathematics and Statistics. Bridge Course program has been included as a mandatory program for the first-year undergraduate students to get acquainted and get accustomed to this new environment in the college. A curriculum needs to be consistent and sustainable and it has been noticed that students joining Commerce program required to strengthen their concepts in scientific subject namely Mathematics and Statistics being from the non-Mathematical background. Therefore, Department of Mathematics and Statistics under the aegis of IQAC decided to develop lecture-based bridge course in Mathematics and Statistics. I take this pleasure to thank Principal Dr. Neelam Arora for their constant support in this endeavour. I Also want to thank out IQAC for their valuable guidance and working towards value creation for students. Last but not the least staff members of Department of Mathematics and Statistics for their values contribution for the same.
